Dear PT Kamoro Maxima Integra,

I am writing to express my interest in the Data Scientist Development Program at PT Kamoro Maxima Integra. With a strong background in data analysis, IT development, and a comprehensive understanding of data science and big data analytics, I am confident I can contribute effectively to your team.

In my previous role as an IT Developer at PT. Poonya Kita Bersama, I created a comprehensive sales dashboard using Looker Studio, providing invaluable insights into sales trends and contributing to strategic decision-making. Additionally, I designed and implemented a real-time stock dashboard, enhancing operational efficiency by providing instant access to critical inventory information. My role also involved managing finance recap and reporting, ensuring meticulous oversight and transparency for accurate and accountable financial operations.

After completing a Data Science Bootcamp at Digital Skola, I expanded my skills in data science methodology, SQL, and programming in Python. I have a strong foundation in analytics, data visualization principles, and advanced knowledge of machine learning theories and techniques. My hands-on experience includes classification methods, regression concepts, clustering algorithms, and advanced model evaluation and selection techniques.

During my time as a Big Data Analyst at PT Kimia Farma, I showcased expertise in big data fundamentals, advanced SQL skills, and proficiency in data analysis and visualization. I crafted and implemented a sales dashboard using Looker Studio, facilitating a comprehensive view of sales data and supporting informed decision-making within the organization.

I have also worked on various data projects, such as the Analyst Bike Sharing Data project, where I led a comprehensive analysis of bike rentals and developed an interactive dashboard using Streamlit. I successfully created a machine-learning model for image classification and developed a robust machine-learning model for stock prediction using TensorFlow.

I am excited about the opportunity to bring my skills and experience to PT Kamoro Maxima Integra and contribute to your data analytics initiatives. Thank you for considering my application. I look forward to the possibility of discussing how my background and skills align with the needs of your team.

Sincerely,

Yodi Fakhri Muhammad
